Long-distance Photoelectric Sensor with Built-in Amplifier

E3G

CSM_E3G_DS_E_6_1

Line of Long-distance Photoelectric Sensors for Large Workpieces Includes Retro-reflective Models with Sensing Distance of 10 m and Distance Settings Up to 2 m.

- Compact Retro-reflective models require less wiring and less space with a sensing distance as long as 10 m.
- Distance-setting models feature a teaching function.
- Stability indicator shows at a glance when operating conditions are stable.
- Relay and selectable NPN/PNP transistor outputs provided.
- Cable, standard connector, and terminal board models available.

⚠ Be sure to read *Safety Precautions* on page 8.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Ordering Information

Sensors (Refer to *Dimensions* on page 10.)

Red light / Infrared light

Sensing method	Appearance	Connection method	Sensing distance	Timer function	Model	
					NPN/PNP selector	Relay output
Retro-reflective (with MSR function)	 E39-R2 (provided)	Pre-wired (2 m)	10 m (500 mm) *	---	**E3G-R13 2M**	---
		Connector (M12)			**E3G-R17**	
		Terminal block		---		**E3G-MR19**
				Yes		**E3G-MR19T**
Distance-setting		Pre-wired (2 m)	White paper (300 × 300 mm) 0.2 to 2 m	---	**E3G-L73 2M**	---
		Connector (M12)			**E3G-L77**	
		Terminal block		---		**E3G-ML79**
				Yes		**E3G-ML79T**

* Values in parentheses indicate the minimum required distance between the Sensor and Reflector.

Accessories (Order Separately)

Reflectors (Refer to *Dimensions* on E39-L/E39-S/E39-R.)

Appearance	Sensing distance		Model	Minimum order	Remarks
	Rated value	Reference value			
	10 m (500 mm) *	---	**E39-R2**	1	Provided with the E3G-R1□/MR19(T).
	---	6 m (100 mm)*	**E39-R1**	1	---

Note: If you use the Reflector at any distance other than the rated distance, make sure that the stability indicator lights properly when you install the Sensor.
* Values in parentheses indicate the minimum required distance between the Sensor and Reflector.

Terminal Protection Cover for Side-pullout Cable (Refer to *Dimensions* on page 12.)

Appearance	Model	Minimum order	Applicable model	Remarks
	**E39-L129**	1	E3G-MR19(T) E3G-ML79(T)	Provided with rubber bushing and cap for pullout prevention in vertical direction.

Mounting Brackets (Refer to E39-L/E39-S/E39-R)

Appearance	Model	Quantity	Applicable model	Remarks
	**E39-L131**	1	E3G-R1□ E3G-L7□	---
	**E39-L132**	1		Rear-mounting use
	**E39-L135**	1	E3G-MR19(T) E3G-ML79(T)	Cable pulled out in the downward direction
	**E39-L136**	1		---

Note: Mounting Brackets are not provided with Sensors and must be purchased separately.

Sensor I/O Connectors (M12) (Sockets on One Cable End) (Refer to *Dimensions* on XS2.)

Cable	Appearance	Cable type		Model
Standard	Straight 	2 m	Three-conductor type	**XS2F-D421-DC0-F**
		5 m		**XS2F-D421-GC0-F**
	L-shaped 	2 m		**XS2F-D422-DC0-F**
		5 m		**XS2F-D422-GC0-F**

Note: Refer to *Introduction to Sensor I/O Connectors/Sensor Controllers* for details.

Ratings and Specifications

Sensing method		Retro-reflective (with MSR function)				Distance-setting			
Item	Model	E3G-R13	E3G-R17	E3G-MR19	E3G-MR19T	E3G-L73	E3G-L77	E3G-ML79	E3G-ML79T
Sensing distance		10 m (500 mm)*1 (when using E39-R2)				White paper (300 x 300 mm): 0.2 to 2 m

I/O Circuit Diagrams

NPN Output

Model	Operation mode	Timing charts	Operation selector	Output circuit
E3G-R13 E3G-R17 E3G-L73 E3G-L77	Light-ON		L side (L-ON)		Dark-ON		D side (D-ON)	

* Set the NPN or PNP selector to NPN.

Connector Pin Arrangement

Pin 2 is not used.

PNP Output

Model	Operation mode	Timing charts	Operation selector	Output circuit
E3G-R13 E3G-R17 E3G-L73 E3G-L77	Light-ON		L side (L-ON)		Dark-ON		D side (D-ON)	

* Set the NPN or PNP selector to PNP.

Connector Pin Arrangement

Pin 2 is not used.

Relay Output

Timer function	Model	Timing charts	Operation selector	Output circuit
None	E3G -MR19 E3G -ML79		L side (L-ON)				D side (D-ON)	
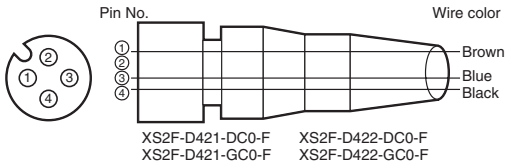
Yes	E3G -MR19T E3G -ML79T		L side (L-ON)	
			D side (D-ON)	

Note: Td1, Td2: Delay time (0 to 5 s)
T_1: A period longer than the delay time.
T_2: A period shorter than the delay time.
* For ON- and OFF-delay timers, Td1 and Td2 are independently variable.

Plug (Sensor I/O Connector)



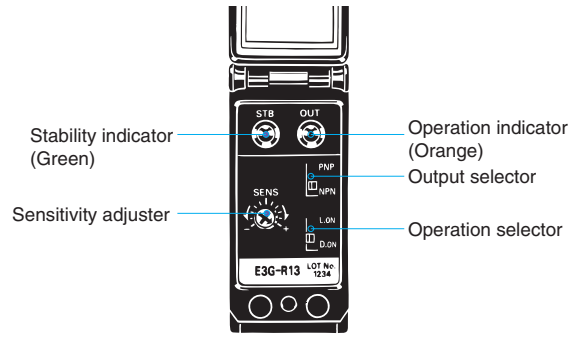
Classification	Wire color	Connector pin No.	Application
DC	Brown	1	Power supply (+V)
	---	2	---
	Blue	3	Power supply (0 V)
	Black	4	Output

Note: Pin 2 is not used.

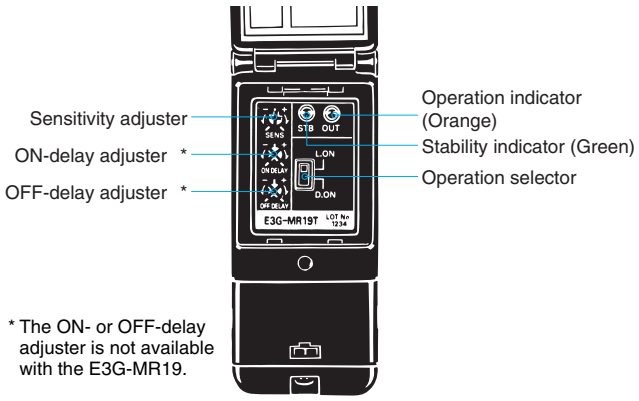
Nomenclature

Retro-reflective

E3G-R13 (Pre-wired Model)
E3G-R17 (Standard Connector Model)



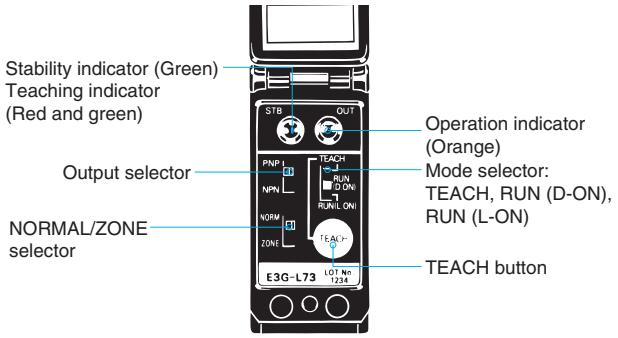
E3G-MR19 (Terminal Block Model)
E3G-MR19T (Terminal Block Model with Timer)



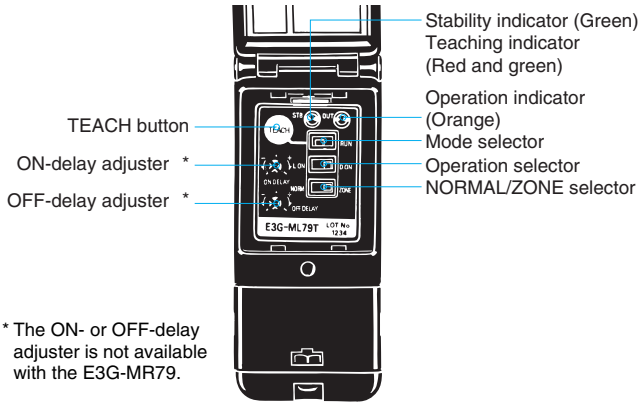
* The ON- or OFF-delay adjuster is not available with the E3G-MR19.

Distance-setting

E3G-L73 (Pre-wired Model)
E3G-L77 (Standard Connector Model)



E3G-ML79 (Terminal Block Model)
E3G-ML79T (Terminal Block Model with Timer)



* The ON- or OFF-delay adjuster is not available with the E3G-MR79.

Safety Precautions

Refer to *Warranty and Limitations of Liability*.

⚠ WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly.
Do not use it for such purposes.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

E3G-R/MR

● Designing

Power Supply

A power supply with full-wave rectification can be connected to the E3G-MR19(T).

● Wiring

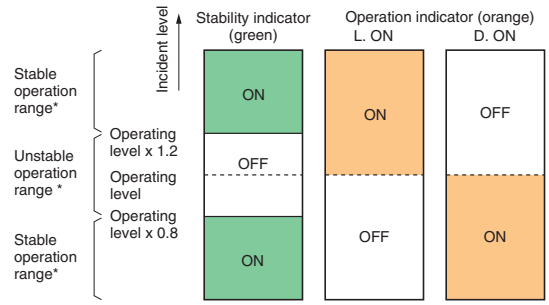
The tensile strength of the cable during operation should not exceed the values shown below.

Model	Tensile strength (torque)
E3G-R13 E3G-MR19(T)	50 N max.
E3G-R17	10 N max.

● Adjusting

Indicators

- The following illustration indicates the operating levels of the E3G.
- Set the E3G so that it will work within the stable operation range.



*If the operating level is set to the stable operation range, the E3G will operate with the highest reliability and without being influenced by temperature change, voltage fluctuation, dust, or setting change. If the operating level cannot be set to the stable operation range, pay close attention to environmental changes while operating the E3G.

E3G-L/ML

● Designing

Power Supply

A power supply with full-wave rectification can be connected to the E3G-ML79(T).

● Wiring

The tensile strength of the cable during operation should not exceed the values shown below.

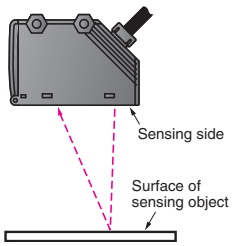
Model	Tensile strength (torque)
E3G-L73 E3G-ML79(T)	50 N max.
E3G-L77	10 N max.

● Mounting

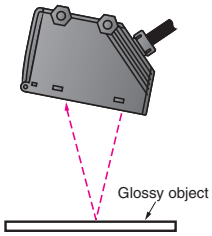
Mounting

Mounting Directions

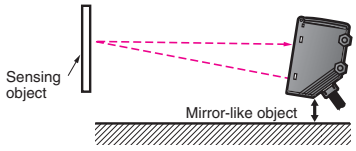
- Make sure that the sensing side of the Sensor is parallel with the surface of each sensing object. Do not incline the Sensor towards the sensing object.



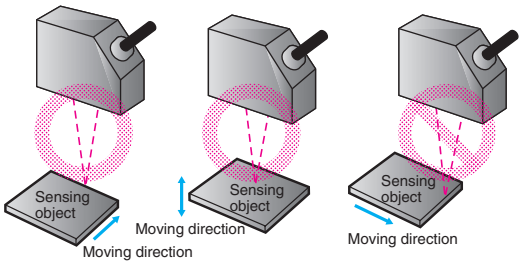
If the sensing object has a glossy surface, incline the Sensor by 5° to 10° as shown below, provided that the Sensor is not influenced by any background objects.



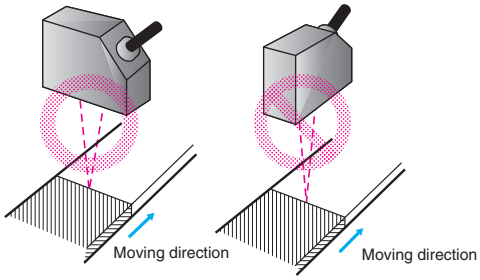
- If there is a mirror-like object below the Sensor, the Sensor may not be in stable operation. Therefore, incline the Sensor or keep the Sensor a distance away from the mirror-like object as shown below.



- Make sure not to install the Sensor in the incorrect direction. Refer to the following.



Install the Sensor as shown in the following if each sensing object greatly differs in color or material.



● Others

EEPROM Write Errors

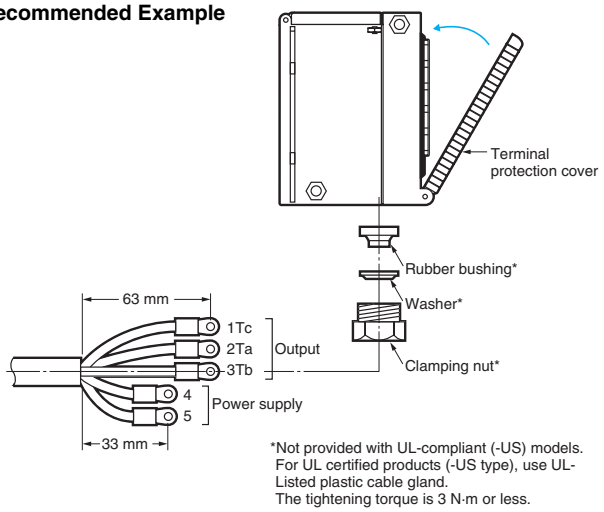
If a teaching data error occurs with the operation indicator flashing due to a power failure or static noise, perform the teaching operation of the Sensor again.

E3G-M□(T)

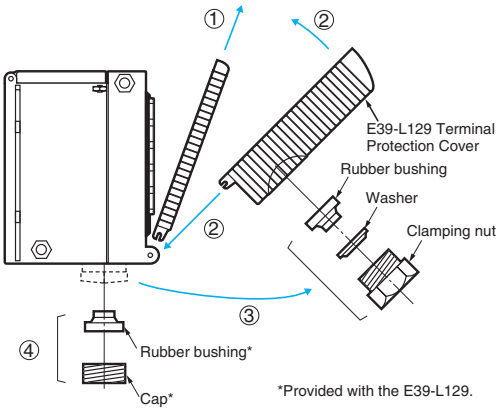
● Wiring

- The cable with an external diameter of 6 to 8 mm is recommended.
- Be sure to attach the cover with screws securely in order to maintain the water- and dust-resistive properties of the product. The size of the conduit opening is PF1/2 in accordance with JIS B0202.
- Do not tighten the Terminal Protection Cover with wires pinched between the Sensor and the cover in order to maintain the water- and dust-resistive properties of the product.

Recommended Example



- Changing to Side-pullout Cable from Vertical-pullout Cable



Procedure	Operation
1	Remove the present cover.
2	Attach the E39-L129 Terminal Protection Cover for side-pullout cable.
3	Remove the clamping nut, washer, and rubber bushing of the E3G. These are used for the side-pullout cable.
4	Attach the rubber bushing and cap provided with the E39-L129 to the E3G as replacements.

All E3G Models

● Designing

Load Relay Contact

If E3G is connected to a load with contacts that spark when the load is turned OFF (e.g., a contactor or valve), the normally-closed side may be turned ON before the normally-open side is turned OFF or vice-versa. If both normally-open output and normally-closed output are used simultaneously, apply an surge suppressor to the load. Refer to *OMRON's PCB Relays Catalog* (X33) for typical examples of surge suppressors.

● Wiring

Connecting and Wiring

The E3G has a built-in function to protect the E3G from load shortcircuiting. If load shortcircuiting results, the output will be turned OFF. In that case, check the wiring and turn ON the E3G again so that the short-circuit protection circuit will be reset. This function will operate if the output current flow is at least 2.0 times the rated load current. If a capacitive load is connected to the E3G, make sure that the inrush current does not exceed 1.2 times the rated load current.

● Mounting

Mounting Conditions

- If Sensors are mounted face-to-face, make sure that no optical axes cross each other. Otherwise, mutual interference may result.
- Be sure to install the Sensor carefully so that the directional angle range of the Sensor will not be directly exposed to intensive light, such as sunlight, fluorescent light, or incandescent light.
- Do not strike the Photoelectric Sensor with a hammer or any other tool during the installation of the Sensor, or the Sensor will loose its water-resistive properties.
- Use M4 screws to mount the Sensor.
- When mounting the case, make sure that the tightening torque applied to each screw does not exceed 1.2 N·m.

● Water Resistance

Tighten the operation cover screws and terminal block cover screws to a torque of 0.3 to 0.5 N·m in order to ensure water resistivity.

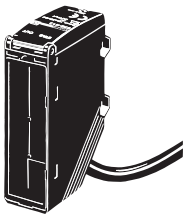
Dimensions

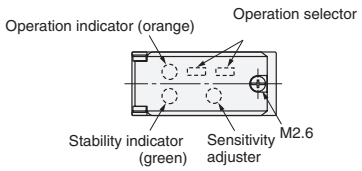
(Unit: mm)
Tolerance class IT16 applies to dimensions in this datasheet unless otherwise specified.

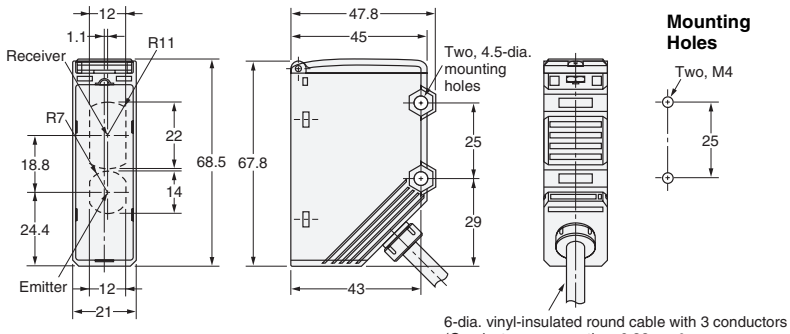
Sensors

Retro-reflective Models

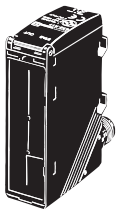
Pre-wired Model
E3G-R13







Standard Connector Model
E3G-R17



Note: All dimensions other than the ones specified below are the same as the corresponding dimensions of E3G-R13.

Terms and Conditions Agreement

Read and understand this catalog.
Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.
(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE
PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.
Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.
See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.
OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.
Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.
Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.
NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.
Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.
Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.
Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.
Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2017.8

In the interest of product improvement, specifications are subject to change without notice.
